General information

- Connect
- Study plan 2018
- Modality
 - o Banner code: LTHI2201.
 - o Modality: online
 - Teaching method: blended learning

Competence

To communicate in a basic level by using everyday expressions and develop the four skills such as listening, reading, writing, and speaking.

Methodology

Course features

Our English as a second language courses correspond to the University's three distinctive elements: **happiness**, **tailored learning experience and experiential learning**.

The content is available in the technological platform (Canvas) assuring the same standard quality, regardless of the place or campus in which the subject is being studied. The activities in each course are designed with the purpose of assuring the development of competences in our students by setting achievable learning outcomes.

Characteristics

This methodology requires the student to complete a set of activities, such as the following:

- There is a quiz for each topic, which must be completed only once inside or outside the classroom.
- There is a learning outcome for each module.
- There is a final evaluation.

In addition, the main characteristics of our courses are the following:

- Blended learning: classroom interaction plus appropriate computer mediated activities.
- Correlation with the Common European Framework of References for Languages (CEFR): students completing a course should reach a level of language skill as described by the CEFR.
- **TOEFL preparation**: including free practice according to the student's level.
- **Grammar reference**: all topics include brief grammar explanations presented with cross-reference to further information and activities on different platforms.
- Vocabulary: American and British vocabulary presented in all topics.

Approaches

Four skill development approach

To provide a well-balanced development of the four language skills (listening, speaking, reading, and writing), this course includes per topic: team activities, individual activities, and homework.

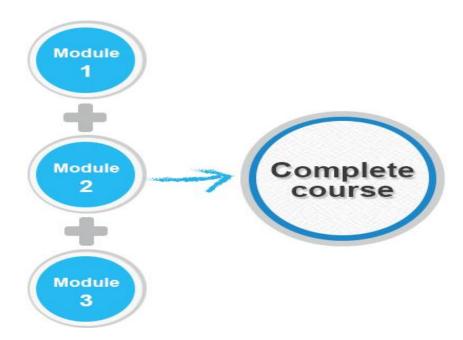

Communicative approach

Students use diverse communication strategies and real-life English to build language and to produce meaningful communication. The role of the teacher will be a facilitator of learning and one of the main tasks is to provide the student with positive feedback. Some of these tasks are student-centered, and it is expected to have active listeners as well as the use of authentic materials to apply knowledge.

• Structural approach to cooperative learning

The activities are designed to positively engage students to the class. To meet the requirements of these activities, student interaction and participation are vital in every activity. In this way, communication and collaborative learning are promoted.

Course content (topics)

Module 1. Getting started on English language

Topic 1. Greetings and introducing yourself

The first topic focuses on two basic elements for a Second Language Learner: *subject pronouns* and *greetings*. In the following teachers' notes, we will provide with additional grammar notes and extra support for each ofthe topics. In topic 1, the first subtopic is **Subject Pronouns**, which tends to be easy to teacher ONLY when we illustrate them with dialogues, realia, photos, and plenty of examples. To achieve students' comprehension on the grammar, we need to take the following into consideration.

 Highlight that fluent speakers of English use subject pronouns to replace names, and they use them to avoid repetitions. Also, contractions are commonly used in conversations, especially when the subject is a pronoun.

- Also highlight that in English there is only one form of *you*, which is used for singular and plural, and for formal or informal situations. In your Sts' language (s), there may be different pronouns for second-person singular and plural and also formal and informal forms. In regard to pronunciation, you need to point out the following:
- Vowels (a,e,I,o,u) have no one-to-one relation between a letter and a sound, e.g., the letter e can be pronounced in more than one way, e.g., he, very, they. However, reassure your Sts that there are more common combinations of letters that are usually pronounced the same way, and these will be pointed out to Sts as the course progresses.

Moreover, another focus of this first subtopic are **numbers**, for this reason get the class to try to count from 0 to 20. You start with the number 0 and get a student to say the next number. Try to elicit all numbers from 0-20. Then do the same counting backwards, starting from 20. Sts can play the next game for higher numbers:

- 1. The game is *Buzz* and get Sts to sit or stand in a circle and count out loud. When they come to a number that contains 3 (e.g., 13) or a multiple of 3 (e.g., 3,6,9) they have to say *buzz* instead of the number.
- 2. If a student makes a mistake, either saying the number instead of *buzz*, or simply saying the wrong number, he/she is out. And the next player begins again from 1.
- 3. Keep going until there is only one student left, who is the winner, or until the group has gotten to 30without making a mistake.
- 4. You can also play *Buzz* with 7, as the wild number and go up to 50.

In the second subtopic, the main grammar point is **verb to be**. Since the vocabulary is nationality, begin with adetailed explanation of the meaning of *nationality*. Tell Sts that the nationality word is normally the same as the word for the language of the country, e.g., in *Spain* the language is *Spanish*, in *Hungary* the language is *Hungarian*, etcetera. As an additional information think about the following and use it as you see fit.

- Remind Sts that in a conversation it is more common to use contractions in negatives than the full form.
- In the negative, the verb **be** can be contracted in two ways, e.g., you aren't Italian (contracting not), or you're Italian (contracting are).
- With short answers, explain to Sts that although native speakers often use yes, I am instead
 of just yes, both ways of answering are perfectly correct. However, answering just yes or no
 can sound abrupt.

Topic 2. Stars and stripes

The second topic develops three important grammar points: possessive adjectives and plurals, adjectives, and imperatives. In the first subtopic, the focus are possessive adjectives, which tend to be complex for Sts since they need to have them clean in their first language. Therefore, clarify the following:

- In some languages, the possessive adjectives agree with the following noun, i.e., it can be masculine, feminine, or plural depending on the gender and number of the noun that comes after. In English, nouns do not have gender, so possessive adjectives do not change, and the use of, e.g., his/her, simplydepends on whether we are talking about something belonging or related to a man or to a woman.
- Remind Sts that your is used for singular and plural.

The first subtopic is also based on **a/an and plurals this/that/these/those**. As additional grammar information, take the following into consideration, so you can explain it to Sts.

- A/an (indefinite article). Articles are easy for some nationalities and more difficult for others, depending on their L1. Here the focus is just on the indefinite article. Some nationalities may not have an indefinite article, and others may confuse the number one with the indefinite article as it may be the same word in their L1.
- **Plural nouns**. The system in English of making regular nouns plural is very straightforward, simply adding an s. "es" (Iz) is added to some nouns when it would be impossible to pronounce the word byadding just an s, e.g., watches. A very small number of English words have an irregular plural form, e.g., child-children.
- The meaning of this/these (for things within reach) and that/those (for things out of our reach or far away) is easier to demonstrate than it is to explain. They can be adjectives (this book) or pronouns(what's this?)
- For pronunciation most nationalities find the th sound difficult to pronounce. As well as having problems producing the sound, they may initially find it impossible to distinguish between the produce the unvoiced* $th/\theta/$ in, e.g., think, and the voiced* $th/\delta/$ in, e.g., this, there, etcetera.
- At this level, you should concentrate your efforts on getting Sts to try to make the actual sound by putting their tongues behind their teeth (you can demonstrate this). But, at the same time, make Sts aware that there is a voiced and unvoiced version and encourage them to hear the difference and to try voicing the / ð/ mother sound. Your goal, as always, should be intelligible pronunciation.

In the second subtopic, you must teach efficiently the meaning, uses and categories of **adjectives**. Remind Sts that the grammar of adjectives in English is very simple and there is only *one* possible form that never changes. Finally, when and adjective describes a noun, there is only *one* possible position: *before* the noun. When you think Sts, need more practice not only for this grammar but for the others.

• Give Sts the grammar photocopiable activity.

In the third subtopic, emphasize the simplicity of **imperatives** by doing the following:

- There are only two forms, e.g., *stop/don't stop*.
- Emphasize also that an imperative can sound abrupt in English if you are asking somebody to do something, e.g., *Close the door (please)*. *I'm cold*. Here it would be much more normal to use a politerequest with *can...*, e.g., *can you close the door*, *please?*
- Let's (= let us) + infinitive is used to make suggestions that include the speaker.
 - a) A positive suggestion is made by using let's + infinitive, e.g., let's go to the movies.
 - b) A negative is made with Let's not, e.g., let's not eat here.

Topic 3. Our habits and routines

The third topic develops *simple present tense* by analyzing the affirmative, negative, questions and question words. To begin with, the first subtopic introduces **simple present in affirmative and negative**, that is why it is important to explain in detail and emphasize the next points.

• There is only one ending in the simple present (third-person singular verbs add an -s or -es). All otherforms are the same as the infinitive. For this reason, the use of the pronoun (*I*, you, etc.), is not optional as it is in many languages. It is essential as it identifies which person is

- being referred to.
- In the negative, highlight the use of don't and doesn't, which are put before the infinitive. These contracted forms (of do not and does not) are almost always used in spoken English and in informalwriting.
- Highlight that goes /govz/ and does /doz/ are spelled the same but pronounced differently.

The second subtopic analyzes **simple present questions**. In this case, there is one important aspect to emphasize and that is the auxiliary *do* and *does* and *jobs*:

- The auxiliary do (and does) can puzzle Sts if they try to translate questions word for word. Explain (in Sts' L1 if you prefer) that auxiliary means "helper", and that the auxiliaries do and does "help" to form questions and negatives. They do not have a separate meaning. The auxiliaries do and does are also often used to soften a yes/no answer. (Which can sound abrupt), e.g., do you live here? No, I don't.
- For pronunciation, point out that many jobs words end with this sound /ər/, e.g., teacher, soldier, etc. If the sound is difficult for your Sts, model it yourself so that Sts can see your mouth position and get Sts to repeat it a few more times.

The third subtopic focuses on **word order in questions**. This word order in English is less flexible than in manyother languages, and this especially true of questions. Sts often have problems remembering the position of the auxiliaries *do* and *does* in simple present questions.

• Remind Sts that the auxiliary comes first UNLESS there is a question word.

Topic 4. How often do you?

Topic 4 is based on three important grammar points: whose...? possessives, prepositions and position of adverbs and expressions of frequency. The first subtopic provides a detailed explanation of whose...? possessives, for this reason, Sts tend not to have many problems with the possessives, which are being used in English with things like places, e.g., Harry's bag and people, e.g., Jane's brother. However, they may be less clear about not using it in phrases like The end of the movie or in compound noun phrases like bus stop (ifthis is an of construction in their L1).

• Names that end in s. James's or James'? After names ending in s, you can add either 's or just apostrophe. We teach the first form as it is more common and follows the basic rule. The pronunciation is / I Z/, e.g., / dgeImzIz/.

The second subtopic is based on prepositions of time **at, in, on**. Encourage Sts to practice the basic rules, such as:

- There is a simple rule for *in*. The rules for *on* and *at* require a little bit more effort to remember, because these include the exceptions *on the weekend, at night*.
- Some uses are not yet practiced (*in* +months and year, *on* + dates) because Sts do not have this lexisyet, but they are focused on later.
- Under prepositions of place, Sts focus on at or in and to. The main goal is for Sts to be clear that at and in are used for position whereas to is used for movement. Sts also learn that in/at are often alternatives when talking about place, e.g., I was in a restaurant/at a restaurant last night.

Sometimes there is a subtle difference between the two prepositions in this context, but it is notnecessary to go into this at this level.

The third subtopic carries out **position of adverbs and expressions of frequency**. In this grammar point, go through the rules with the class.

- The normal position of adverbs of frequency is before the main verb, but after be. However, sometimes, and usually can be used at the beginning of a sentence or clause for emphasis, e.g., sometimes I wake up really early.
- Similarly, the normal position of expressions of frequency is at the end of a sentence or a verb phrase, but they are sometimes placed for emphasis at the beginning, e.g., *Every day I check my emails first thing in the morning*.

Topic 5. Are you participating in the next American Idol?

The last topic in module 1 introduces two new grammar points and wraps up the lesson with a review: can/can't, present continuous and simple present or present continuous? To begin with, the first subtopic introduces can/can't, for this reason, go through the rules with the class and emphasize the following:

- Can is the first modal verb that Sts are introduced to. Modal verbs, unlike normal verbs, do not add s in 3rd person singular (he/she can, NOT he/she cans). Questions are made by inverting the verb and subject, not with do/does, e.g., can you come? NOT do you can come? Negative are formed by adding n't (not), not with don't /doesn't, e.g., I can't swim NOT I don't can swim.
- The normal form of a second verb after a modal verb is the infinitive without to. This can be hard to remember for many Sts who are used to thinking of the infinitive as with to (to be or not to be...) and adding to after can is a common error.
- Although other languages may have an equivalent verb to can (=be possible/permitted), they probably do not use this same verb to also talk about ability (I can sing, I can play the piano) and would express this with an equivalent of know how to.
- There are two pronunciation problems related to can/can't.
 - a) Can is usually unstressed = /kən/ in affirmative sentences like *I can sing*. Your Sts may find this difficult to hear and to say. If they stress can, the listener may think they are saying a negative sentence.
 - b) The negative *can't* is always stressed. Not stressing it can cause a communication problem (the listener may understand *can*, not *can't*). The pronunciation of this word varies among different groups of native English speakers. The standard pronunciation is /kænt/, but there are regional variations. The important thing for Sts is to make surethat they stress /kænt/ very strongly.

The second subtopic illustrates the different uses and structures of **present continuous**. Sts do not usually findthe form of the present continuous difficult (*be* + -*ing* form of the verb), but they may have problems using it correctly, especially if they do not have an equivalent form in their L1. A common mistake is to use the present simple, not continuous, for things that are happening now, e.g., *Hello. What do you do here?* The spelling rules for the -*ing* form are the following:

• With the -ing form, remind Sts that verbs ending in y do not change the y for an I as they do in third-person singular (e.g., study-studying, NOT studing).

The third subtopic contrasts the **present continuous** with the **simple present**. To clarify any difference between these two tenses without confusing Sts, consider these notes:

- There is a clear difference in use between the simple present and present continuous:
 - a) The simple present is used for habitual actions (things that are always true or that happenevery day).
 - b) The present continuous is used for temporary actions, things happening now, at thismoment.
- The use of these two forms can cause problems either because Sts do not have the present continuous in their L1 or because English is "stricter" about using it when talking about now.
- Use your Sts' L1 to contrast it with English, so you can anticipate or correct errors.
- Remind those stative verbs, e.g., want, like, need, have (= possess), and know, are not normally used in the present continuous.

Module 2. Memories and experiences

--- Topic 6. Days we love!

The first topic in this second module introduces three important grammar elements: *object pronouns, the structure like + (verb + -ing)* and *review of be* or *do.* In the first subtopic, we study **object pronouns**, *such as: me, you, him, them, etc.* It is important to go over the uses and examples, therefore consider doing the following:

- Take into consideration that Sts will be familiar with some examples of object pronouns in phrases like *I love you* or *excuse me*.
- Keep in mind the main problems will be with word order and mixing up subject and object pronouns, e.g., *I spoke to she*.
- As a teacher, you could point out that the object pronoun *me* is used instead of the subject pronoun *I* to answer the question *who?* E.g., **A** *Who wants a cup of coffee?* **B** *Me!* (NOT *I*).

The second subtopic introduces **structure like + (verb + -ing)** and for this reason reflect and apply the next points.

- You need to consider that Sts may find it strange that in English we use the same verb to say *I love you* and *I love shopping* (or *I hate him*, and *I hate getting up early*). Highlight that *love* and *hate* are used for strong like and dislikes, not just for emotional feelings for people.
- Explain carefully that when another verb follows *love*, *like*, *don't mind*, *don't like*, and *hate*, the -ing form is normally used, e.g., buying, going, not the infinitive, e.g., NOT I love buy clothes.
- It is highly important to remind Sts that the infinitive with *to* is also possible after *like*, *love*, and *hate*in certain circumstances, and is common in American English, but it may be confusing for Sts, and it's probably best to avoid it at this stage.
- Be ready for mistakes like do you like swimming? Yes, I like very much (no object pronoun it).
- Finally, review the spelling rules by reminding them, e.g., that verbs ending in y don't change the y for an I as they do in third-person singular (e.g., study-studying NOT studing), and about the double consonant in, e.g., swimming.

The last subtopic reviews **be** or **do** because Sts have already learned to use the verb *be*, the simple present, and the present continuous. For many Sts the use of *do* and *does* in questions and negatives in the simple present takes some time to get used to, and, as a result, there is sometimes a tendency

to overuse them. Thus, clarify the next points.

Sometimes, Sts forget that be can work as a main verb and as an auxiliary, and it does not
form questions and negatives in the same way, but simply by inverting the subject and verb
of adding not.

Topic 7. A National portrait

The main objective of this topic is introducing and explaining these grammar elements. Simple past of be: was/were and simple past: regular verbs. In the first subtopic, we focus on the simple past of be was/were, and it is important to exemplify the uses, structure for both in detail. First, was is the past of am and is, andwere of are. You have to explain as many times as possible it is necessary that was and were are used to talk about bothrecent and distant completed actions in the past, e.g., I was tired this morning. Caesar was a Roman Emperor. Moreover, make the following clear.

- Was and were are used exactly like is and are, i.e., they are inverted to make questions (he was > washe?) and not (n't) is added to make negatives (wasn't, weren't).
- Explain that we also use the passive construction was born to talk about the time and place of our birth.
- Some Sts tend to remember was and forget were.
- Focus on the pronunciation of *was* and *were*, which have two different pronunciations depending onwhether they are stressed or not (i.e., they can have either a strong or weak pronunciation).
 - a. Was and were tend to have a weak pronunciation in affirmative sentences. I was /WəZ/born in 1990. They were /Wər/ famous.
 - b. Was/wasn't and were/weren't have a strong pronunciation in short answers in negative sentences. Yes, I was /W^Z/. No, I wasn't /W^Znt/. Yes, we were /War/. No, we weren't /Warnt/.
 - c. Remind Sts that, as well as stressing one syllable more than others in multi-syllable words, we also stress certain words more than others. There are words that carry the "message" of the sentences and are usually nouns, main verbs, adjectives/adverbs, and end position prepositions. Small words like pronouns, articles, and prepositions (not in end position) are not normally stressed. It is this mixture of stressed and unstressed words that gives English its rhythm.

In the second subtopic of **simple past, regular verbs**, it is important to emphasize that the simple past is usedfor completed actions in the past, both distant and recent. The form of regular simple past verb is very easy. The main problem Sts have is the pronunciation, and remembering to use infinitive, not the *-ed* form, after *did/didn't*. Also, the regular simple past ending (*-ed*) can be pronounced in three different ways.

- 1. -Ed is pronounced /t/ after verbs ending in these unvoiced sounds*: /k/, /p/, /f/, /s/, /ʃ/, /tʃ/, e.g., relaxed, stopped, booked, laughed, missed, washed, watched.
- 2. After voiced endings* -ed is pronounced /d//, e.g., arrived, called, changed, showed. This is by far the biggest group.
- 3. After verb endings in /d/ or /t/ the pronunciation of -ed is /id/, e.g., wanted, chatted, needed, decided. This group is very small.
- 4. In practice, the difference between 1 and 2 is very small and can only be appreciated when a verb is said in isolation or is followed by a word beginning with a vowel (e.g., *I liked it*).
- 5. However, the difference between 3 and the other two is significant (it is an extra syllable), and

many Sts tend to pronounce all simple past verbs in this way, e.g., /lalkld). /Stapld/, etcetera.

Extra information

- Voiced consonant sounds are made in the throat by vibrating the vocal cords, e.g., /b/, /l/, /m/, /v/,etc. Unvoiced consonant sounds are made in the mouth without vibration in the mouth, e.g., /p/, /k/, /t/, /s/, etcetera.
- You can demonstrate this to Sts by getting them to hold their hands against their throats. For voicedsounds they should feel a vibration in their throat, but not for unvoiced sounds.

Topic 8. A night to remember

The current topic 8 continues with simple past tense and analyzes two main aspects, *simple past*: *irregular verbs* and *simple past*: *regular and irregular verbs*. In the first subtopic about **simple past irregular verbs**, we need to demonstrate that the vast majority of verbs in the past are regular. However, a few of verbs (several of which are very common) are irregular in the simple past. These verbs don't add -ed in the past, they change their form. This change can be just one or two letters, e.g., *wear* > *wore*, or can be a completely new word, e.g., *go* > *went*. To improve Sts' comprehension on the current topic, take the following points into consideration.

- Emphasize that irregular verbs are only irregular in the affirmative. In questions and negatives, as with regular verbs, the infinitive is used after did/didn't.
- There is a list of the most common irregular verbs on page 165 of the student's book.
- If you think Sts need more practice, you may want to give them Grammar photocopiable activity at this point.
- If you think Sts need more practice about vocabulary, you may want to give them the Vocabulary photocopiable activity at this point.

The second subtopic combines **simple past: regular and irregular verbs**. Therefore, it is advisable to give Sts an extra challenge, for instance, get Sts to predict how the *-ed* pronounced for each verb, /d/, /t/, or /id/. Then, play the listening activity for them to check. Moreover, you could play the three interviews again and get Sts to listen and read the audioscript on *page* 120, so they can see exactly what they understood /didn't understand. Translate and explain any new words or phrases. Also, additional support is to remind Sts of thefollowing:

- The grammar bank reference section is purely review and remind Sts how to form the past tense with regular and irregular verbs using the auxiliaries did/didn't.
- It also reminds them that was/were is the past tense of be and that questions are formed by invertingthe subject and verb, and negatives are made by adding not, e.g., wasn't.

Topic 9. An unbelievable story

The current topic analyzes two main aspects related to *there is/are, some/any + plural nouns* and *there was/were*. In the first subtopic, it is advisable to read through the audio scripts and decide if you need to pre-teach any new lexis before Sts listen. This introduction will help Sts to acquire more vocabulary and get readyfor the grammar explanations. Consequently, it is important to explain and clarify the next grammar notes.

Some Sts tend to always use there is for both singular and plural nouns because in their

- language there is only one form. They may also confuse **there** is/are, and it is/they are.
- Besides, some and any are indefinite articles used here with plural countable nouns. For simplicity'ssake, some is taught here as only being used in positive sentences, however (as will later be pointedout), it can also be used in questions and especially in requests, e.g., Do you want some crackers? Dowe need some more chairs?
- Some and any with uncountable nouns is presented in 10.1.

The second subtopic goes through a set of activities related to **there was/were**. For this reason, it is advisable to begin with vocabulary about prepositions and demonstrate their meaning by using sentences about the classroom, e.g., *A chair in the classroom*. Then, you could give more practice with the prepositions by asking questions about things/people in the classroom. Also, you can encourage and help Sts to cross out silent letters when they learn new words, like this: *listen*. Besides, emphasize that if Sts can recognize the phonetic transcriptions next to words in the dictionary, this will help them to identify silent letters.

• If Sts have dictionaries, you could get them to check their answers with the phonetics in their dictionary. This will help them to build their confidence in dictionary use.

Consequently, the additional support for *there was/were* is based on the next explanations.

- 1. There is/there are can be used in any tense simply by changing the form of be, the past is there was/were.
- 2. Although it works in exactly the same way as *there is/there are*, Sts have a tendency to forget the plural form *there were*.

Topic 10. What kind of food do you like?

In the last topic of module 2, we study two grammar aspects, countable/uncountable nouns; a/an, some/any and quantifiers; how much/many, a lot of. The firs subtopic analyses countable/uncountable nouns; a/an, some/any, which should not cause too many problems, but what may cause confusion is that some words are countable in English, but uncountable in Spanish, e.g., cheese- uncountable in English, countable in Spanish.

Moreover, provide extra explanations by doing the following:

• Give more examples of when a noun can be countable or uncountable. This occurs when we can think of e.g., *a chicken* (a whole chicken) and *chicken* (e.g., chicken pieces).

Other examples

A soda (= a can or glass of soda), soda (= the liquid in general); a coffee (= a cup of), coffee (= a quantity of coffee beans or powder in a jar.

- Sts have already learned the rules for *a/an*, *some* and *any* plus singular and plural countable nouns in **9.1**. Here they can learn that *some* can also be used with singular uncountable nouns meaning "a quantity of", "not an exact amount", e.g., *some butter*, *some milk*.
- Sts may find it strange using *some* and *any* with "singular" words, e.g., *butter*, since they previouslyused *some* and *any* with plural nouns and may have translated them in their heads as plural words.
- Make sure you point out the exception to using some for offers and requests. Sts usually
 assimilate this rule instinctively through learning set phrases like would you like some coffee?

The second subtopic illustrates quantifiers **how much/many**, **a lot of**, etc. Emphasize and go through the rules with the class.

- A lot of: in affirmative sentences, native speakers normally use a lot of for big quantities. It is also possible to use a lot of in negatives and questions, although it is more common to use much/many.
- When we use a lot of (NOT a lot of) in short answers or when we do not give the noun, e.g., I eat a lotof chocolate, but I eat a lot.
- In colloquial English, people often use *lots of* as an alternative to *a lot of*. At this level, it is better just to teach Sts to use *a lot of*, while recognizing the alternate form.
- Much/many: much and many are used mainly in negative sentences and questions. Many is
 also sometimes used in affirmative sentences in formal English, e.g., Many people live in
 houses in the US. However, much is not normally used in affirmative sentences, e.g., NOT
 Americans drink much coffee.
- Tell Sts to think of *much* as a singular and *many* as plural to help them to remember which one to use.

Module 3. Future perspective and achievements

Topic 11. Which one is cheaper?

The first topic, in module 3, focuses on *comparatives* and *superlatives*. The first subtopic is based on **comparative adjectives**, and you may want to clarify the grammar by emphasizing the following:

- There are clear rules governing the formation of comparative adjectives.
- The spelling rules for big, hot, etc. are the same as for verbs ending in -ing, e.g., big > bigger.
- To simplify the rules even further, tell Sts that for short adjectives (one syllable), add *-er*. For all therest (two syllables or more), add *more* (except adjectives ending in *-y*).
- If you think they still need more practice, you may want to give them the grammar photocopiableactivity.

The second subtopic develops **superlative adjectives**, which are similar to comparatives, but Sts must know the differences between both in detail. First, you have to make sure Sts are clear about the difference between comparatives (to compare two things or people, etc.), and superlatives (to say which is, e.g., the smallest/largest, a group or more). In your Sts' L1, they may just use the comparative form +the. (Typical error: the better place in the world...). Moreover, explain the following points carefully:

- Formation of superlatives is very easy once Sts know comparatives . -er changes to -est in shortadjectives, and more changes to the most before long adjectives.
- The spelling rules are the same as for comparatives, e.g., hotter/the hottest; prettier/the prettiest.
- Highlight that we use *in* the world, in the class, etc. after superlatives, NOT of.
- If you think they still need more practice, you may want to give them the Grammar photocopiableactivity.

Topic 12. How do you see yourself in the future?

Teacher's Guide

The topic 12 provides a complete explanation and practice of: *be going to (plans), future time expressions* and *be going to (predictions)*. To begin with, the first subtopic shows everything related about **be going to (plans), future time expressions**. Therefore, you may want to ask Sts to go over the grammar bank on *page* 142 and then clarify the next notes.

- Be going to + base form is the most common way to express future plans, and the main future
 formtaught in this level. It is often used with time expressions like tonight, next week, next
 summer. Sts do not usually find the concept of going to a problem, but the form needs plenty
 of practice. A typical error is the omission of the auxiliary be, e.g., I going to have dinner.
- In song lyrics, *going to* is sometimes spelled *gonna* because of the way it is pronounced. Discourage Stsfrom using this in written English.
- Some Sts may know the future form will and may ask about this. Explain that both going to and will are used to talk about the future. In the American English File series, be going to is presented first totalk about plans and predictions. Going to for predictions is practiced in the next lesson. Sts will learnthe grammar of will in American English File level 2 but will see some examples in practical English.
- For pronunciation, when native speakers speak quickly, they tend to pronounce *going to* as *gonna*. It is a good idea to point out this pronunciation to Sts as they will hear it if they have contact with native speakers or listen to songs, and they will see it written down in song lyrics. This pronunciationis widespread in British and American English, particularly in conversation, although it might not be appropriate in some formal situations. At this level, we recommend that it is better to teach the more "correct" pronunciation, i.e., pronouncing both words *going* and *to* (using a weak form of *to*), and Sts can use the more colloquial form later when their speed of speech increases.

In the second subtopic, we study **be going to (predictions)** and technically the only different is the use of this structure in comparison to the later subtopic. In this section, Sts learned the use of *going to*, so they could express future plans in the previous lesson, here, it is used the same structure to make predictions (what we think or what we are sure it will happen). It is very important to carefully explain that *will* can also be used to make predictions. This is taught in level 2.

Topic 13. Is the first impression the last impression?

The following topic focuses on *adverbs* (manner and modifiers) and the structure of verbs +infinitive. The first subtopic develops adverbs (manner and modifiers) which Sts usually find formation of these adverbs fairly straightforward. To make sure Sts comprehend the grammar correctly, it is advisable to follow the next points.

- Explain that the most common word order with these kinds of adverbs is to out the adverb
 <u>after</u> a verb or verb phrase, e.g., He drives very quickly, I speak English very well (typical error:
 I speak very well in English).
- Sts may try to use *hardly* instead of *hard*, e.g., *I work hardly*. Explain that *hard* is irregular and does not add *-ly*.
- Hardly is a word that means almost not, e.g., I hardly slept last night, I hardly every go to the theater.
 - Sts learned hardly ever in 4.3.

- **Modifiers:** the position of these is very straightforward. You may want to point out that you can'tuse *very* with strong adjectives, e.g., *great, fantastic, awful*, etcetera.
- Pronunciation: adding -ly to an adjective does not change the stress pattern at all, e.g., <u>dangerous-dangerously</u>. Some Sts have a tendency to stress the adverb ending, e.g., <u>dangerously</u>.

In the second subtopic about **verbs** + **infinitive**, you need to provide a clear explanation and practice of this structure. Thus, go through the rules with the class and give a proper answer for questions, you may want tospecify the next points.

- Live is often known as the base form and to live as "the infinitive with to" or "the full infinitive". Thenegative is formed by adding not, e.g., to be or not to be.
- The base form (*live*) is used, for example, in questions and negatives with *do/does* and *did*, e.g., *where do you live? I don't live here*.
- The full infinitive (to live) is used very widely in English. One of its main uses is after a lot of commonverbs like want, need, decide, hot, etc., e.g., I want to live in the city.
- Some verbs, a smaller group, are followed by the gerund (-ing), e.g., like, love, hate (I like cooking), which Sts learned in 6.2.
- However, some native speakers, particularly American, use the infinitive after *like*, e.g., *I like to cook*.

Topic 14. The world of internet

In the current topic, we examine *articles* and a new tense *present perfect*. The first subtopic pulls together the use of **definite/indefinite article (and noun uses)** that Sts have seen so far. It is advisable that you pointout that the grammar bank information covers the basic uses of the article but is not exhaustive, as some of the more complex rules, e.g., the use of articles with geographical words, will be dealt with later in the course. The difficulties you Sts have with articles will depend to a large extent on how articles are used or not used in their L1.

• If you think they still need more practice, you may want to give them the grammar photocopiable activity.

The second subtopic develops **present perfect**, and it is presented here in two of the most basic uses. These two uses, i.e., for recent past actions and experience when the time is not referred to. These uses may be difficult for Sts if they do not know how to use their equivalent correctly in Spanish. Moreover, the form of the present perfect may also be problematic, as it is the first time Sts have seen have used as an auxiliary verb with all its contractions (*I've...*, he's...). Besides, for the regular and irregular past participles emphasize the following:

- Regular verbs shouldn't cause any problems for Sts since they are the same as the simple past. Sts simply have to remember the pronunciation rules for -ed.
- Many irregular past participles also have the same for as the simple past. However, those are different (e.g., speak > spoke > spoken) may cause problems as Sts may confuse the two forms. For this reason, it is worth giving special attention to these verbs.

Topic 15. Have you ever...?

The last topic in this level reviews *present perfect* and *simple past*, and *question formation*. In the first subtopic, it is intended to explain **present perfect and simple past** as a gentle introduction to the

contrast between them. The importance of this review relies on the fact that since many conversations typically begin with an opening question in the present perfect, e.g., have you been to the new French restaurant? Yes, I have and continue in the past tense, e.g., what did you think of it? I love it.

- **Been or gone?** This can be a tricky grammar point for Sts to assimilate. Instead of *Have you been toMexico?* Sts often say (incorrectly) have you gone to Mexico? Or have you been in Mexico?
- After you examine and explain the previous notes, focus on the exercises on page 147.
- For extra support, get Sts to read the dialogue in **C** to practice their pronunciation.
- If you think they still need more practice, you may want to give them the grammar photocopiableactivity.

Finally, the second subtopic **reviews question formation** through grammar, vocabulary, and pronunciation from the whole course. Remind Sts to cover the interview and to look at five of Sir Ian McKellen's answers. Then ask them, what were the questions? To improve understanding, do the following:

- Set a limit for Sts to try to remember the questions.
- Get Sts to compare with a partner before checking answers.
- **Alternative**: put Sts in pairs and tell them to look at the interview again and to choose eight questions to ask their partner.
- Sts interview each other. Monitor and help.
- Get some feedback from the class.

Use of rubrics

The graded activities within each topic and calendar, as well as the course's final presentation, include a rubric that must be used to grade the student's work. This is especially important for our competency model since it is how we measure the development of skills in our students. Each rubric is located in the assignments section, specifically with the name of the week in which it needs to be evaluated.

It is necessary to use the rubric in the final evidence section to grade the final rubric, since the use of the rubric for grading will be constantly audited.

Video available for grading with rubrics.

- How to find a rubric: https://youtu.be/QgDKeZv9tAl
- How to grade assignments using rubrics: https://youtu.be/mAblsLAgIp4

Recommendations

- Training material on the Canvas technology platform
 - Digital tutorial for teachers: https://bit.ly/2SbMaNK
 - Digital tutorial for students: https://bit.ly/35IBnP6
- Where or to whom do I report a detected error in the course content?

You can report it to the account atencioncursos@servicios.tecmilenio.mx, but we ask that you also report suggestions for the content and activities of the course.

• Who tells me the number of sessions and time of each session in the weeks?

The teaching coordinator must provide you with this information.

• In which weeks are the partial exams and the final exam given?

Consult to your teaching coordinator the calendars according to the modality.

Do I have to register the grades on banner and on the educational platform?

Yes, it is important that you register grades on the platform so that students are informed of their progress and receive feedback from you on everything they do in the course. Banner is the official record of the students' grades.
